Coral Reefs

Volume 12 1993

Journal of the International Society for Reef Studies

This journal supplies a focal point for the hitherto scattered literature in this rapidly expanding field of reef studies, publishing analytical and theoretical papers on both modern and ancient reefs. It encourages the search for generalisations about reef structure and dynamics, and reflects the growing awareness among reef workers of the importance of experimentation, modelling and quantification in reef studies. Papers published in the journal deal with population dynamics and community ecology of reef organisms, energy and nutrient flows, biogeochemical cycles, physiology of calcification, reef response to natural and anthropogenic stress, behavioural ecology, sedimentology, diagenesis, reef structure and morphology, evolutionary ecology of the reef biota, and paleoceanography of coral reefs and coral islands. The journal is also open to review articles and perspectives on major scientific problems dealing with coral reefs.

Manuscripts must be sent to the Topic Editors: the Geological Editor, the Biological Editor, or the Environmental Editor

Managing Editor

Dr. Richard W. Grigg
Department of Oceanography
University of Hawaii
Honolulu, Hawaii 96822, USA
FAX (808) 956 92 25

Geological Editor

Dr. Ian G. Macintyre
National Museum
of Natural History
Smithsonian Institution
Washington, DC 20560, USA
FAX (202) 786 28 32

Biological Editor

Dr. Terry Hughes
Department of Marine Biology
James Cook University
Townsville MC,
Queensland 4811, Australia
FAX (61) 77 25 15 70

Environmental Editor

Dr. Barbara E. Brown
Department of Marine Sciences
and Coastal Management
University of Newcastle-upon-Tyne, Newcastle-upon-Tyne
NE1 7RU, UK
FAX (91) 222 78 91
